

File Server Backups Offline

Mike 12/28/2015

I think something might be wrong with fileserver. I tried recovering a file, but when I select one of the 2AM backups, it gives me this error message:

Bill 12/28/2015

It looks like it's fine now Mike. Thank you for bringing this to my attention. Luckily it only looks to have happened yesterday. All other backups can be accessed now. I tested recovery with a file and it works now. I will be keeping an eye on this.
