

The damaged Butterfly

The small damaged butterfly flaps its wings as it falls. A bird over by the butterfly sees this.

The bird swoops down and grabs the butterfly and the butterfly thanks him.

The bird says, "are u ok?" And the butterfly says, "I damaged a wing!"

So the bird takes the butterfly to his nest so the butterfly can heal.

After a while, the butterfly heals and is on his way. The butterfly thanks him again, and hugs him.

As the butterfly flies away, the bird waves to him in the sunset.
