

1. **Highlight** the word/words you want to copy.

Alphabetically

2. Hold down the **Ctrl** key on your keyboard and press and release the **c** key. Let go of the Ctrl key. This stores the word in memory.

3. **Click** inside the **text box** where you want to paste. A blinking line will appear there.

Alphabetically

4. Hold down the **Ctrl** key again, and press and release the **v** key. Let go of the Ctrl key. This will paste the remembered word into the text box.
