

Table Layout

The diagram illustrates the layout of a table with four columns and five rows. The columns are labeled 'Item No', 'Item Name', and 'Quantity'. The rows contain data for 'Nail', 'Screwdriver', 'Saw', and 'Self-sealing stem bolt'. A yellow box labeled 'Select Table' Button points to the top-left corner of the table. A yellow box labeled 'Column' is positioned above the table with a bracket spanning the width of the table. A yellow box labeled 'Row' is positioned to the left of the table with a bracket spanning the height of one row. A yellow box labeled 'Resize Handle' is positioned at the bottom-right corner of the table, pointing to a small square handle.

Item No	Item Name	Quantity
3231	Nail	100
532-A	Screwdriver	3
853ABU	Saw	2
03920	Self-sealing stem bolt	200

Table Cursors

The diagram illustrates various table cursors and their functions. Each function is shown with a yellow label box and a corresponding table diagram.

- Select a cell:** A mouse cursor points to a single cell in the table.
- Select a column:** A mouse cursor points to a vertical bar on the left side of the table, selecting an entire column.
- Select a row:** A mouse cursor points to a horizontal bar on the top side of the table, selecting an entire row.
- Move/select table:** A mouse cursor with four arrows points to the top-left corner of the table, indicating the table is selected for movement.
- Resize column width:** A mouse cursor with a vertical double-headed arrow points to the vertical line between two columns, indicating the column width is being adjusted.
- Resize row height:** A mouse cursor with a horizontal double-headed arrow points to the horizontal line between two rows, indicating the row height is being adjusted.
