The **homepage** is the webpage that is displayed when you first open your web browser.

To set your homepage in **Firefox**:

1. **Open** Firefox.
2. **Go** to the website that you want to be your homepage.
3. **Click** on the **Menu button** and **click** **Options**.
4. Under the **When Firefox starts** subheading, **click** **Show your home page**.
5. Under the **Home page** subheading, **click** **Use Current Page**.
